of Ashtabula Country

February 19, 1987

Christine Klemme United States Environmental Protection Agency RCRA Activities A-3587 Chicago, Illinois 60690-3587

Re: RMI's RCRA Permit Request

Dear Christine Klemme.

The League of Women Voters of Ashtabula County urges the United States Environmental Protection Agency to consider the natural resources and the health of the citizens of Ashtabula County when deciding to issue a Resource Conservation and Recovery Act permit to the RMI Company-Sodium Plant (East 6th St., Ashtabula, Ohio). The League strongly believes that the RMI Company should bear primary responsibility and liability for the hazardous waste they produce and the adjacent property owners and residents and users of surface and ground water should not bear the burden from improperly managed hazardous substances. The RMI Company, the hazardous waste transporters and the off-site landfill owners and operators should also handle waste in a responsible manner and be held liable if negligent.

As you are well aware, Ashtabula County already has a very high rate of cancer and Downs Syndrome and very serious pollution problems. Please consider this before taking final action on the RCRA permit request. We feel that a good program of monitoring and enforcement is needed to protect our natural resources and our citizens.

Sincerely,

Cynthia Moisio Nagy, President 1346 Clay St.

44047 Jefferson, Ohio

RE: RMI Sodium Plant Public Information Materials

Dear Mrs. Cowan:

This is to follow-up on my letter sent to you in January of this year requesting that you please keep the public information materials for RMI Sodium on display until further notice.

Enclosed please find additional information which I request you keep available for public display until further notice. This material relates to the statement in the Public Notice of the tentative determination of a prior release at the site. I have enclosed another verification form indicating your receipt of this material. Please sign and return the form to me in the self-addressed, stamped envelope.

Thanks again for your assistance. Please contact me at (312) 886-3715 if you have any questions.

Sincerely.

Christine Klemme Solid Waste Branch

#### INSTRUCTIONS TO PUBLISHERS

Extreme care should be exercised to insure that the specifications for advertising to be set other than solid be definite, clear, and specific since no allowance will be made for paragraphing or for display or leaded or prominent headings, unless specifically ordered, or for additional space required by the use of type other than that specified. Specifications for advertising other than solid and the advertisement copy submitted to the publisher will be attached to the voucher. The following is a sample of solid line advertisement set up in accordance with the usual Guardiane Company Company Chicago C requirements.

Your bill for this advertising order should be submitted on the "Public Voucher for Advertising" form, which is printed on the reverse of this form, immediately after the last publication of the advertisement. If copies of the printed advertisement are not available, complete the affidavit provided on the voucher. Submit the voucher and a copy of the printed advertisement to .....

Ms. Leonora Santelli, 14th Floor CHY S194 MINO 30 S. Dearborn, Chicago, IL 60604

DEPARTMENT OF HIGHWAYS & TRAFFIC, D.C. Bids are requested for first spring 1966 cement concrete repair contract, including incidental work, Washington, D.C., Invitation No. C.-5576-H, consisting of 11,000 sq. yds. PCC Class A pavement, alley, & driveway repair, both cut repairs only. Bidding material available from the Procurement Officer, D.C. Sealed bids to be opened in the Procurement Office at 8:00 p.m., November 15, 1965.

## THATROPHIECEINED

Charges for advertising when a cut, matrix, stereotype or electrotype is furnished will be based on actual space used and no allow-

opened A NUTUIE ID TO case shall the advertisement extend beyond the date and TATHEMHOUSE stated in this order.

## RMI Company

## RADIO BROADCAST ANNOUNCEMENT

The United States Environmental Protection Agency (U.S. EPA), Region V (FIVE), is renoticing its intent to issue a Resource Conservation and Recovery Act permit to RMI Company-Sodium Plant (RMI), for operation of its existing hazardous waste storage and treatment facility located at East 6th Street, two miles off Route 20, Ashtabula, Ohio. A previous announcement was placed on this radio station on September 30, 1986.

A Public Hearing will be held on February 10, 1987, at 7:00 P.M. in the Kent State University, Ashtabula Campus, Auditorium, to accept public comments into the record. Written comments on the draft permit or information on releases of hazardous waste may be sent to the U.S. EPA, Solid Waste Branch, Chicago, Illinois 60604, and must be postmarked by February 23, 1987.

The permit application, the Draft Permit and Statement of Basis, are available for inspection at the Ashtabula Public Library, 355 44th Street, Ashtabula, Ohio (contact Ms. Cowan, Head Librarian).

For more information, citizens should contact the Solid Waste Branch at (312) 886-3715.

Ashtabula Public Library 355 44th Ashtabula, Ohio 44004

Dear Mrs. Cowan:

Per my telephone conversation with Ms. Peg Kimpton, of your staff, approximately one month ago, the United States Environmental Protection Agency (U.S. EPA), Region V, will receive comments on the permit application and U.S. EPA draft permit for the RMI Company-Sodium Plant which is located at East 6th Street, two miles off Route 20, Ashtabula, Ohio. Please make the items listed below available for public review at the Ashtabula Library as soon as they are received. Please complete the enclosed verification form in order for our Agency to be assured that these materials were received.

- A copy of the RMI Company permit application
- A copy of the U.S. EPA, draft permit for RMI

- A copy of the U.S. EPA, Fact Sheet for RMI

- A copy of the Public Notice to be published in the Ashtabula Star Beacon on September 30, 1986, advising the availability of these materials at the Ashtabula Library
- A copy of the U.S. EPA, Region V, pertinent Public Participation Regulations

Please retain the materials on file for public access until further notice.

Thank you very much for your cooperation in assisting our effort to serve the public. Please contact me at (312) 886-3715, if you have any questions.

Sincerely,

Christine Klemme Solid Waste Branch

### RMI Company

### RADIO BROADCAST ANNOUNCEMENT

The United States Environmental Protection Agency (U.S. EPA), Region V (FIVE), and Ohio Environmental Protection Agency (OEPA), have prepared a draft permit for RMI Company-Sodium Plant (RMI), for operation of its existing hazardous waste storage and treatment facility located at East 6th Street, two miles off Route 20, Ashtabula, Ohio. U.S. EPA and OEPA also give notice of their tentative determination that there have been no uncorrected releases of hazardous waste or constituents to the environment from any current or previous solid waste management units at the RMI facility.

A Public Hearing may be held on November 3, 1986, at 7:00 P.M. in the Kent State University, Ashtabula Campus, Auditorium, to accept public comments into the record. U.S. EPA AND OEPA RESERVE THE RIGHT TO CANCEL THIS HEARING IF A WRITTEN REQUEST FOR A HEARING IS NOT RECEIVED BY CLOSE OF BUSINESS ON OCTOBER 20, 1986. Written comments on the draft permit or information on releases of hazardous waste may be sent to the U.S. EPA, Solid Waste Branch, Chicago, Illinois 60604, and must be postmarked by November 20, 1986.

The permit application, the Draft Permit and Statement of Basis, are available for inspection at the Ashtabula Public Library, 355 44th Street, Ashtabula, Ohio (contact Ms. Cowan, Head Librarian).

For more information, citizens should contact the Solid Waste Branch at (312) 886-3715.

IN FORMAL Speech. (Set up 1st Map) (Thank you chais) (Informal: Eglain - Summize formal)

The RMI-Sodien plant (is a 50 are site - Icated) produces sodium and chlorine from salt. The Two types of hazardona waste produced by their process are the subject of the parmit we'll be discussing toright (ACAA) RMI's production process also generates a third type of hozardons waste, a sulfuric acid vaste. RMT neutralizes this acid or site soil is no longer hazardone. This type of neutralization process is spengt perpending requirements.

I will now describe RMI's management of the two types of waste that are the subject of then permit under the law referred to es "ACKA" The first + ypo is a dry solid natural called cell bath waste . It is considered hogardous vicase it cortains high concentrations of the heavy netals barrier, lead, and condruin a RMT manages this waste by storing it in a structure or site (My) and then shippy it off sile to a landfill which can augst this tipe frate. It is this storage structure that is the subject of this permit. U.S. EPA has found that this structure reets all Jederal requirements for storing RM±'s type of waste. Under the RCRA program, we call this structure an enclosed waste selo.

It is a 34ft. × 9ft. × 12 ft. high structure with a roof and walls on 3 sites, and a concrete base. May within this structure is a second containment stricture which halds the waste of this one consists of six foot high walls lived with steel, and a concrete base loved with steel. The open and has a sloped dike to prevent stormurator from entirize The pornit cortains the following key conditions as required by Federal regulations to ensure safe management of that waste:

I waste identification. RMI can only pit the waste they have identified to us into the sale at a morninum of 40 cm. yels, at one thro, I key must test this waste on a regular basin to show that waste has it charged. a) Design & Operation: The waste pela stratement be maintained such that no havinds are deliberately placed on the site and no liquids enter the pile from stormate. Other, whe waste mute continue to the most ensure that the pile is protected from being blown about by winds. Roading a enloading operation must be done in award with presedue described in pervitage beating.

Because the wate is a dy asked material, with the operations practices I just montioned, managenet of this waste pile schooled prevent this waste from contaminaty the success ownament.

3) Inspections. An I must follow a specific irrepoction schedule to ensure full compactions of hey must been recorded documently their inspections, which will be revised by USEPA & OEPA,

4) Clasere on when or if AMI decides to cease operations, they mud close down the waste pile the as land out in a plan veloped gam I, and attacked as part of the pent. This plan require the removed, of all payondon wate from The water all at closer, and decor of equipment harsly the water haddetion, as long as and has the parnit, they ant be able to donoutrate to US EPA that They have funde avoid for closers.

The second type of hazardous water produced at the RMI plant is waste soduin and calcum strage that is removed a few times a year from piping and other equipment that hardle the sodium product. This waste is considered hazardon hecare it is highly reactive with water (explader). This incirculator is and exclosed room where waste is placed and ignited by natural gas torches.

gas torche.

The major permit requirement fully with me:

Deste identification. RMI can increate only the waste describel to 0.5- EPA in their permit application.

This voite, when incinerated, should not release significant quantities of hazardon chemicale hat one controlled by this permitting program.

Therefore, put's permit states that the compay must analyze would entiry the incineration or a regular basis to ensure that the wrote composition does to dange (to a point whee has chemicals would be released.)

Depector. An I mut impect its

mainerator operation on a regular bridge

to cheek that proper wrater as oriting the

incinerator and that general dafely

practice are expleted. They mut beek

alcords on their spectron impection, which

will be evaluated by USEOA & OEDA

3) Closere again, if the facility closes, they
must close out the state pile so incineration
such that all hazardors waste removed from
the init, equipment to decord. Also, as lay
as they have the permit, must be able to ahow
furarcial ablilty to pay for closure.

to addition the specific requirest for these + no enite, she failiff mut also comply with a variety father general requirets, such as recordkeeping, personal training, and continger plans for resporely to energencies with that may affect the hay, master.

This pervit will also require ALT to address other sources of wante at their ficility which who not covered by ACRA until the arendments of 1984. Those are sources of wante that for a variety of rechmind reasons char't fall under the RCRA program but could still be source of release of hazardore chemicals into the environment.
